

Self loading system; Drill rig can lift themself up to 1.4 m. that enables easy and loading Gearbox Sliding System...

Powerful Gearbox

High Torque with Heavy Duty Hydraulic Motor...

Crawler system;

2,5 km/h traveling speed

SURFACE

with standard crawler

DRILL RIG

Hydraulic rod; Handler system rods and casings can be easily handled with hydraulic robot arm

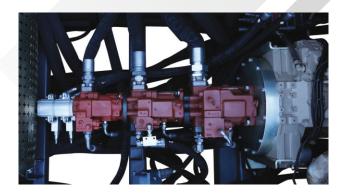

E

BD**1200**T

Reliable control and warning system and indicators for monitoring all drilling equipments and their functions are located on the control panel. In addition, a multifunctional display panel (murphy) is used to display motor functions and motor failures.

Economical and powerful motor Cummins 6 Cylinder motor

Control panel; easy & user friendly interface

BULLDRILL powerful mud pump; 140 lt flushing capacity per min at max 70 bar

Main Winch Drum 10 ton capacity with automatic lock

Top winch practical anduseful top winch

BD1200T is equipped with a DOUBLE SPEED gearbox drive turning unit with a drilling depth capacity of 1200 m. in holes NWL diameter, providing the torque and speed required for core drilling.

TECHNICAL SPECIFICATIONS

BD1200T SURFACE DRILL RIG

Çıkışlı Şanzımanlı Döner Kafa / Rotary Head with High Torque Output
